## LANGUAGES AND FRAMEWORKS

- Python
- Django
- Langchain
- Selenium / BeautifulSoup
- Streamlit
- FastAPI
- SQL
- HTML/CSS/JS

## TECHNOLOGIES

- Docker
- Linux
- CI/CD
- Snowflake

## LANGUAGES

- Uzbek (Native)
- English (C1 Certificate)
- Russian (B1 Level)

## WORK HISTORY

### Python Backend Developer

ProSigma | Oct 2023 - Present

- Built an AI chatbot called Freezy, an expert in making Snowflake queries, using OpenAI API.
- Built a web app for Freezy using streamlit, a Python library.

### Backend Developer

UzProgers | Jan 2023 - Oct 2023

- Built a backend service for online English language testing service (UzToz) with more than 40 API routes using Django and its Django Rest Framework
- Built a backend for Avia ticket sales service, including more than 50 routes of APIs and an XML parser that parses available ticket requests from XML to JSON format, in another API service.

### Backend Developer

CyberPark | Apr 2022 - Nov 2022

- Built a Facebook parser that scrapes given Facebook links of page, group, user, or post, in the least detectable way.
- Built a backend service with 40+ RESTful API routes for a Facebook parser that served the data to the frontend
- Wrote both unit and Integration tests for both the parser and its backend service
- Built parsers for news sites (kun.uz, stadion.uz, etc) and job posting sites (hh.uz, rabota.uz)

## EDUCATIONAL BACKGROUND

### Bachelor of Software Engineering

Tashkent University of Information Technologies | 2011  
GPA: 3.93 / 79%
